Author Index

Volume 16

	Page		Page
Ball, Ernest	151	Mussehl, Frank E.	279
Bonner, John Tyler	213	Opdyke, Marion	127
Braun, Armin C.	65	Pace, D. M.	75, 279
Breder, C. M., Jr.	189	Potter, Richard L.	199
Diller, Irene Corey	109	Rahn, Otto	59
Eastlick, Herbert L.	199	Ralli, Elaine P.	55
Eaton, Orson N.	175	Senn, Milton J. E.	56
Frank, Henry G.	287	Silberberg, Martin	127
Gallant, Dorothy L.	287	Silberberg, Ruth	127
Harris, Morgan	215	Sinnott, Edmund W.	213
Katzberg, Allan A.	15	Spencer, John L.	243, 255
Krogman, Wilton Marion	56	Swan, Emery F.	27
Landolt, Paul A.	279	Teir, Harald	85
Latimer, Homer B.	47	Toennies, Gerrit	287
McCashland, B. W.	75	Trim, Peter T.	1
Meredith, Howard V.	1	Zemgalis, Rasma	37, 43
Moment, Gairdner B.	231		

Subject Index

	Page
Abnormal growth	190
Acid and alcohol tolerance by bacteria	59
Acid phosphatase	202, 206
and carbohydrate metabolism	208
in cytoplasm of unfixed adipose cells	209
in nuclei of endothelial cells and erythrocytes	208
in nuclei of fat cells	208
Adipose tissue	199
of chick	199
of mouse	199, 200
of rat	200
Adventitious development	195
Age of dam, effect on fetus length and weight	187
Agrobacterium tumefaciens	66
Alcoholic extracts of chick embryos	215
Alcoholic fraction of chick embryos, effect of	218
Alectis ciliaris	193
Alectis indica	193
Alkaline phosphatase	200, 202, 206
Alstroemeria	171
Alterations of cell size and mitotic activity	85
Alutera schoepfi	194
Amino acid supplement for dialyzed media	223
effect on growth of fibroblasts	224
Analysis of pigeon crop-milk	283
Anthropometric ratios	1
reliability statistics of	6
variability statistics of	8
frames of reference	9
correlation findings	11
Apical cell theory	161
Apical dominance, theory of	234
Apo-enzymes and vitamins	37

Page

Articular cartilage 133
Ascorbic acid 293
Axial gradients, theory of 234
Bacterial assays 38
Benign growth 196
Biochemical mechanism of growth 232
Body form 1
Book reviews 55, 56, 213
Boys, body form of 1
  anthropometric ratios 1
Bud formation 169
Calcium carbonate, effect on riboflavin efficiency 40
Caloric intake, effect on skeletal growth in mice 127
Caloric intake of animal fed *ad libitum* 131
Caranx equula 194
Caranx sexfasciatus 193
Carassius auratus 192
Cartilage, development of, in mice fed synthetic diets 132
Cell proliferation in embryo-extract 215
Cell size in the orbital gland of the white rat 85
Cell wounds 66
Cellular changes induced by spleen extract 17
Cellular proliferation in fishes 189
Chaetodipterus faber 192
Chemical and biological properties of mitosis-stimulating agent in tissue extracts 85
  solubility of 89
  influence of heat on 91
Chrysoblephus gibbiceps 194
Co-factors, effect on growth of chick fibroblasts 227
Comparison of weight and growth of sheep and goat fetuses 185
Conditioning process in formation of plant tumors 74
Constitution of shoot apex 173
Crop-milk, method for obtaining 284
Crown gall, transformation process in 65
  conditioning of host cell 65
Culture conditions for measuring activity of folacin 288
Cyanide 76
  effect on growth 76
  effect on respiration 77
Cytological studies of sarcoma 37 109
Dauermodification in growth of peas 275
Developmental aberrations induced by ultrasound 276
Dialysate of chick embryo extract, characteristics of 222
Dialysis of chick embryo extract 217
Diets, effect on development of mouse skeleton 144
Differentiation, theory of 231
Dog spleen,
  growth of 47
  weights of 48
Drosophila 199
Dryopteris aristata 170
Effect of cyanide on growth 76
  on respiration 77
Effect of niacin on growth and death of *Lactobacillus* 44
Effect of temperature on mitotic activity induced by tissue extracts . . . 94, 95
Effects of ultrasonic energy on root tip cells 251
Effects of ultrasonic vibration on progeny of treated plants . . . 262, 264, 265
Embryonic adipose tissue 201
  of mouse 203

Page
Enzyme activity and rapid proliferation 207
Enzymes in embryonic stages 206
Enzymes of adipose tissues in embryos 199
of subcutaneous fat bodies of chick 202
Esterase 203, 206
activity in new born mice 207
in adipose tissue of the rat 200, 202
Evynnis cardinalis 194
Factors influencing tumor development
genetic 190
environmental 190
Fat, dietary, influence on growth, development and ageing 150
Fetal growth 52
Folacin, effect on growth of bacteria 287
growth responses to 294
medium for study of 289
standard responses of 289
Folic acid medium 294
Fractionation of embryo extract 216
Free amino nitrogen 225
Function of niacin 43
Germination of ultrasonically treated seed 258
Glycogen 203, 206
in adipose tissue 200, 202
in interscapular fat bodies 207
Goat fetus, measurement of 180, 181, 182
Goats 175
Growth
abnormal 15, 190
benign 196
biochemical mechanisms of 232
developmental 52
measurement of 287
of bacteria 279
chickens 279
fibroblasts 220, 224, 227
Lactobacillus 44, 59, 292
in assay medium 39
mice 127
peas 255, 275
sheep and goat fetuses 185
shoot apex 161
ontogenetic 189
proliferative 189, 190, 215
skeletal 127
spleen (dog) 47
tumor 15, 197
uncontrolled 189
Growth
effect of cyanide on 76
folacin on 287, 294
niacin on 44
Growth activating agents 86
and apical dominance 234
and axial gradients 234
and form in native-born white boys 1
Growth factors in alcoholic extracts of embryonic tissues 215
in pigeon crop-milk 280
Growth limitation, voltage theory of 531

Page

Growth measurement, reliability coefficients of 5
Growth promoting action of pigeon crop-milk 284
of dialyzable factors 229
Growth responses of bacteria to folacin 287
High fat diets, effect on skeletal growth and development in mice . . . 127
Histochemical studies of chick adipose tissue 202
on enzymes in adipose tissue 199
of mouse adipose tissue 203
Histogen theory 161
Histological and cytological effects of ultrasonic vibrations 246
Homo sapiens 1
Hyalinization in cartilage 132
Hypertrophic cells as a result of high carbohydrate diet 132
Inclusion bodies in sarcoma 37 119
Incorporation of vitamins into cell protoplasm 62
Increase in fresh weight of ultrasonically treated peas 261
Inheritance of ultrasonically induced variations in plants 256
Iridio bivittata 195
Kalanchoe daigremontiana 66
Karakul sheep, fetuses of 176
Lactic acid in culture medium 45
Lactobacillus casei 37, 63, 287
response to folacin 291
response to teropterin 290, 291
Lactobacillus citrovorum, growth of 292
Lactobacillus fermenti 59
Lactobacillus plantarum 38, 43
Length of primary root of peas treated with ultrasonic vibration . . . 258
Leucovorin, effect on growth of *Lactobacillus* 292
Linum perenne 171
Lipase in adipose tissue 200
Lupinus albus 151
Lysin from splenic preparations 20
Lysis of tissues 15
Lytic effects of splenic extract on mouse tumor 20
Macy Foundation Conferences (book reviews)
Transactions of The Second Conference on the Adrenal Cortex . . . 55
Transactions of The Conference on Infancy and Childhood 56
Maternal transmission of cytoplasmic effects 274
Mean weights of mice on synthetic diets 131
Measurements of
arm circumference 7
stem circumference 7
calf girth 7
biachromial width of shoulders 7
chest girth 7
karakul fetuses 175, 177, 178, 179
Meristematic cells 173
Mice, growth and development under high fat diets 127
Microscopic studies of mice fed synthetic diets 146, 147
Minimum cell numbers 173
Mitosis, stimulation of, by tissue extracts 88
Mitotic activity in outer orbital gland 87, 96
Morphogenesis, an Essay on Development (book review) 213
Morphogenetic change induced by ultrasonic vibration 253
Necrosis of cells 17
Niacin, function of 43
Nuclear aberrations caused by ultrasonic vibration 248
Nuclear atrophy 17

Page
Nuclear hypertrophy 17
Nuclear inclusions 118
Nuclear phenomena in sarcoma 37 115
Nucleic acid derivatives 226
Nucleoli of tumors 118
Ontogenetic processes in fishes 189
Orbital gland, extract of 86
Orbital gland tissue
chemical nature of 106
effect of drying on 100
effect of heat on 104
Outgrowth of chick heart fibroblast 220
Oxygen consumption and CO_2 elimination in *Tetrahymena* 82
Oxygen consumption in absence and presence of cyanide 80
Pagrus major 193
Papillomas in fish 195
Paralichthys olivaceus 194
Physiochemical changes induced by ultrasonics 254
Pigeon crop-milk 279
effect on growth of chicks 279
Pisum sativum 243, 255
Platax pinnatus 194
Plug formation in cartilage 132
Potassium cyanide, effect of concentration on growth 75, 83
influence on respiration 75
Prenatal growth of dog spleen 47
Primary shoot, differentiation of 151
Procambium, maturation of 160
Production of shoots by shoot apex 173
Protease activity of ultrasonized pea seedlings 270
Protection of cells by vitamins 40
Psetta maeotica 194
Pteroylglutamic acid 287
Pygidium totae 192
Random proliferation of tissues 190
Rate of spine regeneration in sea urchins 32
Ratios
upper extremity 4
body stem 4
lower extremity 4
shoulder-pelvic 4
thorax-abdomen 4
Recovery of root tips subjected to ultrasonic vibration 254
Reduced germination following exposure to ultrasonic vibrations 273
Regeneration of spines by sea urchins 27
Relative viability of tissues stored in spleen extract 18
Riboflavin, efficiency of 40
Ribonucleic acid, effect on growth of chick fibroblasts 226
Root meristems, effect of ultrasonic vibrations on 243, 255
Root tips, effect of ultrasonic vibrations on 245
Sarcoma 37
cellular conditions in 109
vascularization and growth patterns 113
growth rates 115
nuclear phenomena 115
chromosome conditions 115
cell inclusions 119
types of cellular degeneration 119
Sea urchins, regeneration in 27

Page
Seedling height, effect of ultrasonic vibrations on 259
Sheep 175
Shoot apex
constitution of 173
division of 151
regeneration of 153
Single system for measuring growth responses to folacin 287
Skeletal growth in mice 127
Specific differentiation 236
Spleen extract and tumor growth 15
Spleen weights, as percentages of body weight 53
Spontaneous degeneration in sarcoma 37 119
Spontaneous tumors 190
Statistics of reliability and variability for anthropometric ratios . . . 6, 8
Streptococcus lactus 61, 287
response to folacin and teropterin 292
Strongylocentrotus 27
Subepiphyseal plate 132
Sulfhydryl compounds and oxidation-reduction potentials 239
Symposium on Healthy Personality (book review) 56
Synthetic nutrients 215
Techniques for tumor staining 112
Tetrahymena geleii 75
Thiamin, effect of on growth of *Lactobacillus* 59
Theory of differentiation 231
Theory of tumor growth 197
Tissue extracts, effect on growth 85
Tissue lysis by splenic preparations 15
Tolerance imparted by thiamin 59
Tolerance of *Lactobacillus* for lactic acid 60
Tolerance theory of niacin function 43
Tolerance theory of vitamin function 37
Tradescantia 177, 244
Trauma, effect on tumor development 196
Tropaeolum 172
Tumors of fish 191
Tylosurus raphidoma 192, 196
Ultrasonic radiation, intensity of 252
patterns of disturbance provoked by 252
Ultrasonic vibrations, effect on growth and inheritance of *Pisum* . . 243, 255
effect on physical-chemical constitution 267
Ultrasonic vibrator 244
Uncontrolled growth 189
Vascular tissues, effect on development of shoot apex 170
Vitamin C, effect on *Streptococcus* 61
Vitamin fed cells 45
Vitamin function, tolerance theory of 37
Vitamin starved cells 45
Weight and length correlations in sheep and goats 183
measurements of fetuses of sheep and goats 175
Weight changes in chickens fed pigeon crop-milk 282
Weights, caloric intake and microscopic findings in growth zones of mice
137, 138, 140, 143
White rat, experimental cell conditions in 85
